

ASEPTI-LOK V38 3S

CLOSURE SYSTEMS INTERNATIONAL

- Provides consumer safety with patented controlled venting features
- Three-lead, linerless 38mm cap, ideal for aseptic applications
- Suitable for wet and dry sterilization

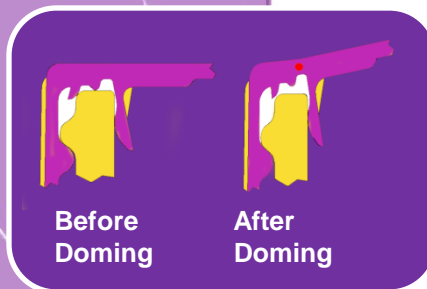

ASEPTI-LOK V38 3S

EXCELLENT PERFORMANCE. . . ENHANCED PROFITABILITY

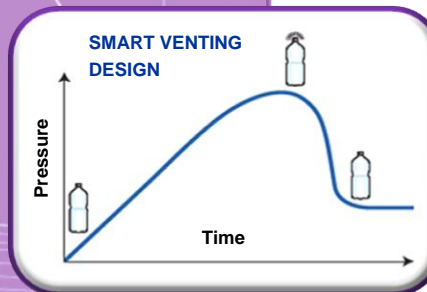

Asepti-Lok V38 3S is a one-piece, linerless 38mm closure, ideal for aseptic filling applications. CSI's patented 'smart venting' safety features add an important layer of consumer safety. With controlled 25 psi venting and resealing, Asepti-Lok V38 3S provides superior anti-blow-off protection.

Ideal for Aseptic Filling Applications

- Three-lead, one-piece linerless design
- Fits 38mm 969-1876 and 969-1875 bottle finishes
- Compatible with existing aseptic lines
- Suitable for both wet and dry sterilization methods

Smart Venting Design Feature

- Early pressure release results in longer thread engagement after venting
- Maximum anti-blow-off security
- Ensures safe consumer opening even if post-opening product spoilage occurs

CSI Total Capping Solutions

- Closures, capping equipment and unmatched technical service
- Robust application performance with the lowest defect rates in the industry
- Application engineering expertise that delivers the lowest cost of operations
